Dear CfA,

I am currently seeking collaborators for my thesis research at the Graduate School of Design at Harvard University. Cfa has been a guiding star in my intellectual and activist sky for many years and I'm quite happy to write to you today.

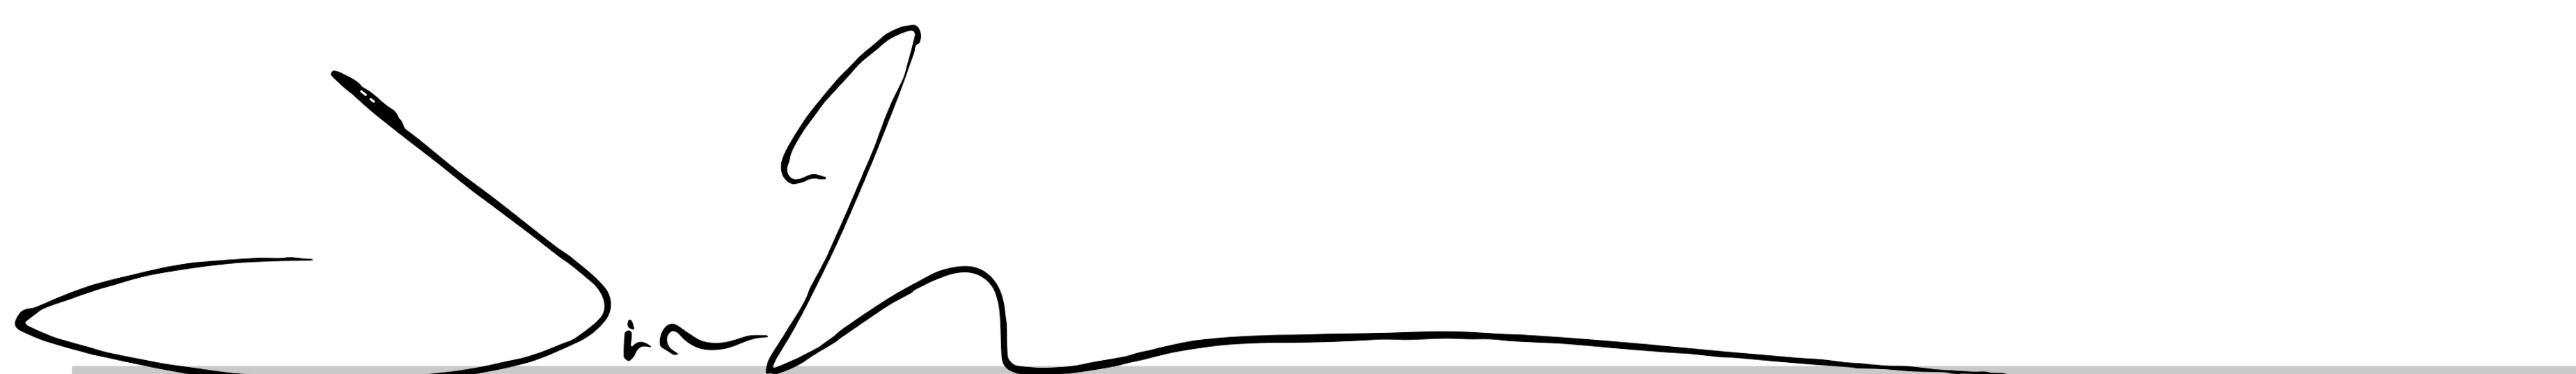

My thesis research concerns issues of civic technology, user-centered and co-design for public good, and the building and maintenance of community in an over-connected and under-committed world.

My background is in data systems design for the labor movement, with several years of field organizing for political campaigns before that. Ultimately, trying to get closer to the grassroots led me to user-centered design and all of the thorny issues of community, tech and power that lie behind it.

I would like to discuss any opportunities you might have to work toward these goals over the coming year. I'm a deft hand at several flavors of design research, as well as data analysis (including ML), interface design, software and hardware engineering.

I believe that your mission aligns squarely with my passions and expertise and I would look forward to the opportunity to illuminate meaningful problems and design some considered solutions with you.

Sincerely,

James Moffet

about

As a designer and technologist, I am obsessed with discovering how technology may be deployed to deliver an alternative future. As a graduate design researcher, I have learned to temper this obsession through a range of ethnographic research techniques and critical theory that have taught me to resist the internal inertia technologies tend to assert and instead apply user-centered, systems-level thinking to the awesome challenge of improving people's lives.

education

2016 - 2018

**Harvard University
Graduate School of Design**

Master's degree,
Design Technology Studies

skills

Design Research
UI/UX Design
Data Science
Software Engineering
Hardware Engineering
Public Speaking
Project Management
Product Design

work experience

OutVote/COMM!T

2017
Cambridge, MA, USA

- Founder / UXR / Data Scientist
Founded civic tech startup COMM!T to test efficacy of peer-enforced smart contracts in driving civic participation. Joined forces OutVote civic networking startup in running 2017 election MVPs.

Civic Tech Fellow

Summer 2017
Cambridge, MA, USA

- UXR / Designer / Engineer
Developed civic technology for the City of Cambridge with a focus on open source citizen analytics apps that can be deployed by volunteer organizations with minimal technical volunteer labor.

MIT Community Innovators Lab

2016 - 2017
Cambridge, MA, USA

- Project Lead / UXR / Engineer
Managed a democratic capacity mapping project for the MIT Community Innovators lab. Oversaw research labor as well as designed and engineered a democratic capacity mapping and organizational partnership tool.

Fulbright Research Fellow

2015 - 2016
Cambridge, MA, USA

- Design Research / Project Mgmt
Researched community fablabs at the Center for Media, Data and Society at CEU in Budapest. Also piloted OpenLab public design workshops in UXR, interface design and hardware/software prototyping for public projects.

SEIU

2009 - 2014
Portland, OR, USA

- Data Architect
Full-cycle design and development of a financial-member system handling 25M records, 50 corp. partners, \$5M revenue.
